

TECHNICAL INFORMATION

ORIGEN BIG G Heavy Duty Alkali Degreaser

DESCRIPTION

ORIGEN BIG G is an all in one heavy duty alkali general purpose degreaser. Big G is a versatile product and by simply altering the dilution ratio this product becomes anything from a heavy-duty degreaser to a general purpose detergent. Big G is a biodegradable chemical formulation that manages the hardest of waters and breaks surface tension which makes cleaning of soiled areas that much easier.

APPLICATION

ORIGEN BIG G effectively removes oil, grease, fat, stains, carbon and dirt. This multi-purpose alkali solution is designed and intended for use as a degreaser and general-purpose cleaner when diluted with water at the following concentration. For maximum results, this product should be used with warm water, be allowed sufficient contact time with the soiled area and conservative amounts of agitation to assist with the removal of heavy-duty grime.

General Cleaning	100:1
Heavy Duty Cleaning	20:1
Concrete Floors	50:1
Engine cleaning	20:1

Directions for use: Spray, brush or wipe the diluted product onto the surface to be cleaned. Preferably use warm water, agitate with broom or brush for a period of time until the dirt or soiled area has loosened.

Allow the chemical to have sufficient contact time so that it can break the surface tension of the affected area. Once this process is complete rinse the product off with a high-pressure gun or hose.

*MSDS available on request.
