

TECHNICAL INFORMATION

ORIGEN V-MAX Solvent Degreaser

DESCRIPTION

ORIGEN V-MAX is a solvent based degreaser suitable for use in heavy duty automotive and general purpose applications.

APPLICATION

ORIGEN V-MAX is intended for use as a cleaning solvent for heavy duty, automotive and industrial applications.

Directions for use: Spray, brush or wipe the diluted product onto the surface to be cleaned. Agitate with brush or cloth until the dirt or soiled area has been released from the surface.

Allow the chemical to have sufficient contact time so that it can break the surface tension of the affected area. Once this process is completed rinse or spray the product off with a high pressure gun or hose.
