Travel Box Portable Refrigeration

National Luna has its manufacturing facility based in Edenvale, Johannesburg, South Africa. The company was formed in 1987 and has been supplying specialised 12 Volt battery operated products used in the following applications:

- Caravans
- General camping
- Mobile camper vans
- Trucks
- Sedan Vehicles
- Yachting and boating

Due to ongoing demand for smaller mobile refrigerators, a compact and cost-effective range of mini-fridges has been developed to suit all recreational requirements.

NATIONAL LUNA is the importer and distributor for the full range of products in South Africa and offers a 3 year warranty and nationwide back-up service.

EXTERNAL FEATURES

REVERSABLE LID

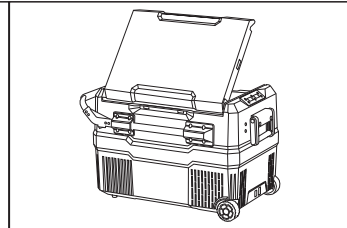

The TB20, TB35, TB45 & TB60 are all fitted with a reversible lid, which allows the lid to be removed and re-attached to the opposite side.

Travel Box 20

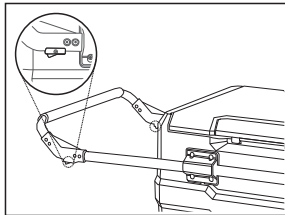

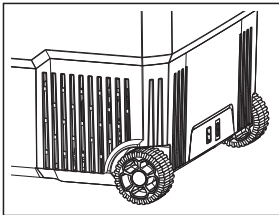

Travel Box 45

MOBILITY FEATURES

WHEELS & HANDLE

For ease of transport the TB45 and TB60 are fitted with two rear wheels and an extendable handle. Depending on your application, these features can be removed should they not be required.

ACCESSORIES

PROTECTION JACKET

The TB20, TB35, TB45 & TB60 are supplied with a protection jacket for general use.

This jacket will protect the fridge from scratches and keep harmful African ultra-violet sunlight from damaging the plastic components.

ACCESSORIES

AC POWER SUPPLY

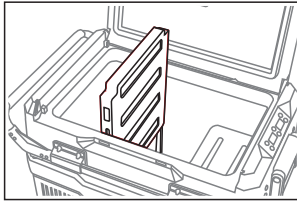

The TB20, TB35, TB45 & TB60 models are supplied standard with an external AC power supply which allows the refrigerator to operate from 100-240Vac input.

This is an optional feature on the TB15 & TB18.

INTERNAL FEATURES

REMOVABLE DIVIDER

The TB45 and TB60 Dual Control models are fitted with a removable divider.

This feature allows the refrigerator to be switched from a Dual Compartment to a Single Compartment fridge with independent temperature control.

CAPACITY GUIDE

BOTTLE SELECTION

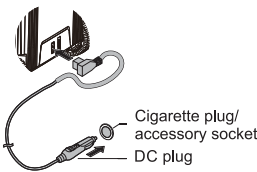

The five icons below are listed under each fridge model and will indicate which fridge is best suited to your application with regards to bottle type and 330ml can holding capability.

SPECIFICATIONS

LOW VOLTAGE CUT-OUT

To prevent excessive discharge to your battery, all fridges have a low voltage cut-out. Some fridges incorporate battery protection circuitry which allows the user to select the desired low battery cut-out.

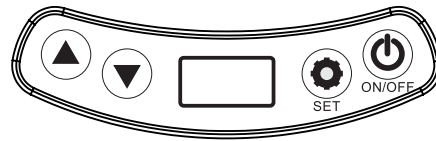

TB45 & TB60

SPECIFICATIONS

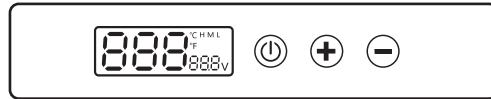

INTELLIGENT CONTROL

All models are equipped with an easy-to-read digital thermostat which is a programmable intelligent controller. These controls display the current bin temperature(s), allows an exact temperature to be set (within the specified range) as well as provides the ability to manually select between normal and high-speed modes for even faster cooling.

TB15 & TB18

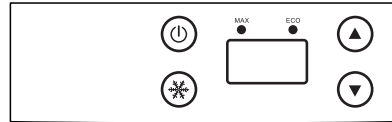

TB20

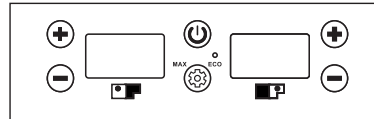

This model doesn't include a MAX & ECO mode function, but it does include an input voltage indicator.

TB35

TB45 & TB60

SPECIFICATIONS

COMPRESSOR UNIT

The TB15, TB18, TB20, TB35, TB45 and TB60 models are all fitted with compressors that will operate at 12Vdc and 24Vdc.
