

TECHNICAL INFORMATION

ORIGEN LC-EP 295 Lithium Complex EP Grease

DESCRIPTION

ORIGEN LC-EP 295 is a premium grade lithium complex grease designed to be resistant to heat, water, and high load. This grease is fortified with polymers and extreme pressure additives.

APPLICATION

ORIGEN LC-EP 295 is suited for most general-purpose applications including industrial bearings, track rollers, pins and bushes, 5th wheel plates, open gear, chains and other general purpose applications.

BENEFITS

- Wide range of applications.
- High resistance to wear.
- High load and extreme pressure capability.

TECHNICAL CHARACTERISTICS

NLGI	2
Dropping Point	295
Viscosity at 40°C cSt	220
Viscosity at 100°C cSt	25.4
Penetration @ 25°C	265-295
Colour	Beige
