

TECHNICAL INFORMATION

ORIGEN MOLY TAC MS-2 Molibdinum Disulfide Extreme Pressure Grease

DESCRIPTION

ORIGEN MOLY TAC MS-2 is a lithium complex grease formulated with 3% molybdenum disulfide to provide excellent lubricating qualities over a wide range of temperatures. This specialized grease is designed to work under the toughest conditions with excellent chemical stability. The addition of moly ensures additional protection against sliding, friction, and wear.

APPLICATION

ORIGEN MOLY TAC MS-2 is designed for a wide variety of on and off-road applications. It is also an ideal grease for heavy duty industrial applications. This grease is particularly suited for heavy loaded pins, shafts and other high stress surfaces which are subjected to vibration and sliding action.

BENEFITS

- Wide range of applications.
- High resistance to wear.
- High load carrying capability.

TECHNICAL CHARACTERISTICS

NLGI	2
Viscosity at 40°C cSt	320
Viscosity at 100°C cSt	28
Dropping Point	260
Penetration at 25°C	280
