

TECHNICAL INFORMATION

ORIGEN WR FOOD GRADE GREASE Food Grade Grease

DESCRIPTION

ORIGEN FOOD GRADE GREASE is an aluminum complex NLGI 2 grade grease designed for food processing applications. This grease will not pound out during heavy load applications, has excellent water-resistant properties and superior rust and corrosion capability. This grease is effective in a wide range of temperature applications and a superior extreme pressure additive package allows for a high Timken rating.

APPLICATION

ORIGEN FOOD GRADE GREASE is designed for use in applications where this product may come into contact with general food processing plants. Also, very good for applications that experience excessive amounts of water contact.

BENEFITS

- High Timken load.
- Excellent anti wear properties.
- Superior lubrication over a wide temperature range.

TECHNICAL CHARACTERISTICS

NLGI	2
Dropping point	280
Viscosity at 40°C cSt	270
Timken OK Load kg	40
Penetration @ 25°C	250
