

TECHNICAL INFORMATION

ORIGEN TAC 22-G Graphite Grease

DESCRIPTION

ORIGEN TAC 22-G is a premium quality lubricating grease containing a high concentration of finely dispersed synthetic graphite additive. The graphite reduces friction, prevents seizure and acts as a reserve lubricant if the grease runs off due to overheating.

APPLICATION

ORIGEN TAC 22-G is recommended for applications where water washing & contamination may be a problem. Typical uses are in pumps glands, open gears, pins, bushes, 5th wheels and screw threads.

BENEFITS

- Reserve lubrication in event of run off.
- Excellent anti wear properties.
- Superior lubrication over a wide temperature range.

TECHNICAL CHARACTERISTICS

NLGI	2
Dropping Point	-90
Penetration at 25°C	250
Timken OK Load kg	30
