

TECHNICAL INFORMATION

ORIGEN CRATER NO 2 GREASE Crater Grease NLGI 2

DESCRIPTION

ORIGEN CRATER NO 2 GREASE is a residual oil-based adhesive lubricant, which is recommended for industrial applications where a heavy lubricating, low-cost lubricant is required.

ORIGEN CRATER NO 2's GREASE coating protects exposed metal surfaces and the cohesive coating remains pliable and effectively cushions contacting surfaces and gears. The high load carrying capacity of the residual base oil ensures that a tough, durable film is maintained on the exposed surfaces and gears.

APPLICATION

ORIGEN CRATER NO 2 GREASE is recommended for use on chains, sprockets, open gears, sliding surfaces, enclosed gears, wire ropes and flexible couplings.

BENEFITS

- Outstanding anti-wear characteristics.
- Protection against corrosion and rust.
- Quiet operation of gears.

TECHNICAL CHARACTERISTICS

NLGI	2
Colour	Black
Viscosity, mm ² /s @ 100°C	416
Flash Point, COC, °C	283
Pour Point °C	35

15kg
