

TECHNICAL INFORMATION

ORIGEN HTP CHAIN LUBRICANT

Synthetic High Temperature Chain Lubricant

DESCRIPTION

ORIGEN HTP CHAIN LUBRICANT is a premium synthetic chain lubricant designed to provide exceptional performance, superior protection and increase productivity. These scientifically engineered lubricants are formulated to provide outstanding and balanced performance in demanding applications at high and low temperatures. Reduced friction produces lower operating temperatures and improves efficiencies.

APPLICATION

ORIGEN HTP CHAIN LUBRICANT is recommended for use in a wide range of chain and roller bearing applications that are exposed to both high and low temperatures or where improved efficiencies are required. They are particularly effective in applications where the maintenance costs and component replacement costs are high.

BENEFITS

- Superior high temperature protection and oxidation resistant.
- Long life reduces maintenance costs.
- Helps reduce friction and increase efficiency.
- Helps to protect equipment and reduce down time.
- Prevents corrosion.
- High load carrying capability.

TECHNICAL CHARACTERISTICS

ISO	220
Density at 20°C kg/m-3	0.90
Viscosity at 40°C cSt	220
Viscosity at 100°C cSt	15.9
Viscosity Index	175
Flash Point	262
Pour Point	-30
