

TECHNICAL INFORMATION

RD COMPOUND No. 9 Rockdrill Emulsion

DESCRIPTION

ORIGEN RD COMPOUND No. 9 is a invert emulsion fortified with anti-wear, anti-rust and extreme pressure additives to protect the internal working parts of drill components against wear, corrosion and friction loads.

APPLICATION

ORIGEN RD COMPOUND No. 9 has been designed to operate in all pneumatic drill applications in mild to severe conditions. May also be used as an in-line air tool lubricant.

BENEFITS

- Environmentally friendly.
- Excellent in extreme pressure conditions.
- Extended life of equipment and less downtime.
- Exceptional anti-wear and corrosion protection.

TECHNICAL CHARACTERISTICS

Density @20 °C	0,95
Viscosity @ 40°C	300
Flash Point	Non-Flammable
Water Content	45
