

## TECHNICAL INFORMATION

### ORIGEN DLA 8000 Diesel Lubricity Additive

#### DESCRIPTION

**ORIGEN DLA 8000** is a lubricity additive designed for light and heavy distillates, including kerosine and low viscosity automotive diesel. It is based on proven monoacid technology.

#### APPLICATION

**ORIGEN DLA 8000** is suitable for all types of distillates, including kerosine (paraffin) and diesel fuel with poor lubricity properties.  
Not recommended for lighter fuels, such as gasoline.

Recommended Dosages:

|          |          |               |
|----------|----------|---------------|
| Kerosine | : 400ppm | (400ml/1000L) |
| Diesel   | : 200ppm | (200ml/1000L) |

#### TECHNICAL CHARACTERISTICS

|                                  |       |
|----------------------------------|-------|
| Viscosity, Kinematic: cSt @ 40°C | 16.5  |
| Density @ 20°C                   | 0.897 |
| Flash Pt., C (PMCC)              | 109   |
| Pour Pt., C                      | -6    |
